

## THE STATE HISTORICAL SOCIETY OF MISSOURI RESEARCH CENTER-KANSAS CITY

K0006

Missouri Valley Chapter-Society of Architectural Historians (MVC-  
SAH) Architectural Records Collection

ca. 1906-ca.1970

ca. 1200 cubic feet

*Architectural drawings, specifications, photographs and other documents related to buildings in Kansas City, Missouri, constructed or modified between the years ca. 1906-1970.*

### HISTORY:

The drawings of buildings, and occasional attached specifications were filed with the City of Kansas City as part of the application of building permits to build or modify buildings. The records would apply only to structures within the corporate city limits of Kansas City, Missouri. Building permits were only required after about 1910 and not all building types were kept by the city—i.e. few private residences are represented in the collection.

### PROVENANCE:

These materials were received as accession KA0147 on May 22, 1982 from the Missouri Valley Chapter - Society of Architectural Historians. The Society obtained them from the Building Permits Department of the City of Kansas City, Missouri, which had discarded them in 1972.

### COPYRIGHT AND RESTRICTIONS:

The Donor has given and assigned to the State Historical Society of Missouri all rights of copyright which the Donor has in the Materials and in such of the Donor's works as may be found among any collections of Materials received by the Society from others.

**PREFERRED CITATION:**

**DESCRIPTION:**

This collection consists of architectural drawings, specifications, photographs, and other documents related to buildings in Kansas City, Missouri, constructed or modified between the years ca.1906 and ca.1970. These documents were originally filed as part of the application for building permits from the city. The vast majority of the structures are commercial, public, and multiple occupancy residential buildings. Few single family, duplex, triplex, or quadriplex dwellings are included in the collection.

Some 3,500 buildings are represented in the collection.

Due to the scope and size of the collection, a separate database finding aid is available. Buildings may be accessed by building title, location, and the architect's name.

Documents listed below are primarily specifications that were attached (rolled inside) of building drawings. They have been flattened and filed using the same control number assigned to the related roll of drawings. Also listed are some specifications, which did not have related drawings.

**INVENTORY:**

*See Architectural Records database for specific buildings.*
